Women's Health

Coronary heart disease is the leading cause of death for Australian men and women and claims a life every 10 minutes. (ref: National Heart Foundation)

In 2007, 47% of those who died from heart disease were women.

Coronary heart disease claims four times as many women's lives as breast cancer.

We are therefore especially delighted to welcome Dr Julie Bradley to Adelaide Cardiology on 30 November. Along with Dr Karen Teo, we are now pleased to be able to offer our patients the choice of two female cardiologists.

Medical Director

Medical Director software is used by approximately 90% of GP Practices in South Australia. As such, Adelaide Cardiology is very excited to announce our "Request for Cardiology Investigations" is now available on the latest Medical Director release, version 2.96.

This enables referring practitioners to complete the referral quickly and easily within their own software system ensuring a permanent record on the patient's electronic file, whilst removing the need for paper pads in the office.

The request form can be accessed via:

Letter Writer > New > Supplied Tab > double click on **Adelaide Cardiology Request Form.**

Electronic Claiming of Medicare Rebates

Adelaide Cardiology is pleased to offer our patients the option of claiming their Medicare rebate electronically at our Wakefield, Modbury and St Andrews Clinics. This provides a secure, convenient way for patients to claim the rebate which is paid into their nominated cheque or savings account almost immediately. Patients will need to bring their EFTPOS and Medicare cards along with them to access this facility.

Setting the Pace at The City to Bay

The 2009 City to Bay Fun Run was a great success and the stunning weather brought out record crowds. Adelaide Cardiology was no different, entering our biggest team yet of 40 staff, family and friends. It was a great way to spend the day and of course, get some healthy heart exercise!

Dr John Sangster
Dr Robert Waltham
Dr Peter Steele
Dr Joseph Montarello
Dr Michael Brown
Dr Glenn Young
Dr Daniel Cehic
Dr Enzo DeAngelis
Dr Peter Sage
Prof Stephen Worthley
Dr Patrick Disney
Dr Karen Teo
Dr Dimitrios Lypourlis
Dr Julie Bradley

Introducing....

Dr Julie Bradley

Dr Julie Bradley graduated from the University of Adelaide, MBBS with Distinction in 1978. Her basic physician training was completed at Flinders Medical Centre with advanced training cardiology at the Royal Adelaide Hospital.

Julie obtained her FRACP in 1985 to become Adelaide's first female cardiologist. FCSANZ was awarded in 2005.

In 1986 Julie spent 6 months at Brompton Hospital in London studying Doppler echocardiography. Although Julie practices general cardiology her special interest remains in echocardiography including transthoracic, transoesophageal, intraoperative transoesophageal and exercise stress echocardiography together with women's heart health issues.

Julie was appointed Senior Staff Specialist Cardiologist at the Royal Adelaide Hospital in 1988 and will continue in this role. She is also involved in research and teaching commitments. Julie brings broad clinical experience to Adelaide Cardiology and we are excited to have her as part of our team.
